The Highway to Compromise

The Road to Compliance with TechR2

The Journey to Compliance with TechR2's Patented End-of-life Ecosystem Solutions Will Define the Future of Your Enterprise.

tech2

A Roadmap to Success. Experience It!
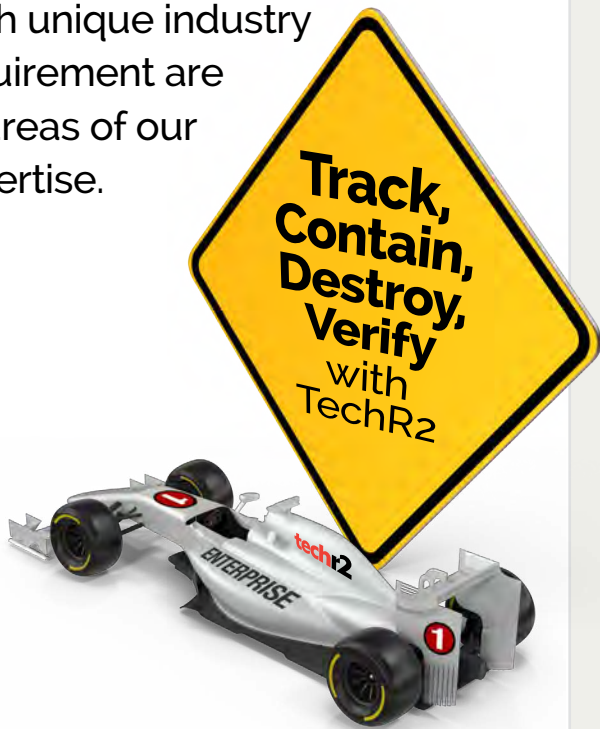

Every organization is responsible for compliance with all government and international regulations and mandates that protect their customer data.

With over six ISO, NIST and NAID AAA certificates, TechR2 is prepared to help fulfill these requirements in all of your end-of-life management tasks.

The challenges you encounter in managing data assets, passing audits, and meeting each unique industry requirement are all areas of our expertise.

Track, Contain, Destroy, Verify with TechR2

Risk awareness comparisons

| Risk it alone	tech**⟲** Partnership
Off site data device processing and use of unsecure transport	Risks are contained onsite with RFID. For off site transfer, our Secure Transport services are proven the best in the industry
Vendor insider threats	Our Zero Trust Model eliminates this vulnerability
GDPR violation risks	TechR2 is GDPR compliant & NAID certified, avoiding regulatory potholes
NIST regulation failures	TechR2 follows NIST regulations with annual audits
Cyber whistleblower reports, leading to fines, legal fees and arrests	TechR2's staffed personnel is trained in handling data management controls for critical data
A traceable carbon footprint and added toxins to our landfills	TechR2 maintains a Zero Landfill Policy, following our pledge to honor the environment
Unforeseen problems with hefty overtime and third party labor costs	TechR2 maintains efficient policies and procedures to accurately calculate and maintain budget parameters
Taking shortcuts that elevate risks, and decrease profits	TechR2 solutions help eliminate devastating repercussions that occur from lack of compliance and industry expertise

tech R2

What differentiates us as an industry leader?

Below is an illustrated roadmap highlighting the processes TechR2 partners will receive onsite.

1
Risk Assessment
ISO 27001 ISO 31000

2
Implementation Roadmap
ISO 9001

3
Training
ISO 9001

4
Cleanout

EXECUTION

5
Datacenter with Tear-A-Byte® and techBOX
ISO 20243
TEAR-A-BYTE
techBOX

6
Onsite Data Destruction

5
Enterprise and Co-locations with Tear-A-Byte®, Tear-A-Vault, and techBOX
TEAR-A-VAULT
TEAR-A-BYTE

7
IT Asset Retirement with Tear-A-Vault, and techBOX
ISO 20243 ISO 14001

8
ISO 14001 Recycling
ISO 14001

9
Risk Mitigation & Compliance
ISO 27001 ISO 31000

10
Asset Management Customer Portal

1. Risk Assessment
- We identify risk for data-at-rest and check compliance to industry and federal regulations.

2. Implementation Roadmap
- A plan is created to secure the datacenter and loose media devices throughout the enterprise.

3. Training
- Company managers, technicians and quality control personnel receive complete training, support and certification.

4. Cleanout
- All critical-level non-secured assets are tracked and destroyed.

5. Tear-A-Byte® and Tear-A-Vault
- Tear-A-Byte's patented Track-Contain-Destroy-Verify process and Tear-A-Vault's Track-Contain-Sanitize-Repurpose process provides your Datacenter, Enterprise & Co-locations with unmatched media security.

6. Onsite Data Reconciliation and Destruction
- Onsite reconciliation of data is captured by certified TechR2 technicians.
- Onsite destruction is then performed to NIST standards and meets the Department of Defense requirements for purging classified information.

7. IT Asset Retirement
- Devices that do not contain critical data are collected in a techBOX™, then recycled to EPA standards.

8. ISO 14001 Recycling
- We manage environmental responsibilities in a systematic approach, contributing to environmental sustainability.

9. Risk Mitigation and Compliance
- TechR2's customer service and security specialists conduct quarterly Compliance Checkups based on ISO 27001 and ISO 31000 best practice policies.

10. Clients have access to our online Customer Portal for:
- Audit & Reconciliation Reports
- Certificates of Destruction
- Green Reports
- Add or remove users or schedule onsite services

We offer these comprehensive services within our family of solutions:

Tear-A-Byte®
(Patented Solution)

- ◉ **Track**
- ◉ **Contain**
- ◉ **Destroy**
- ◉ **Verify**

Appliance Capacities
- ◉ 24U
- ◉ 10U

Tear-A-Vault™
(Patent Pending Solution)

- ◉ **Track**
- ◉ **Contain**
- ◉ **Sanitize**
- ◉ **Repurpose**

Appliance Capacity
- ◉ 42U

Datacenter Decommissioning

- ◉ **Track**
- ◉ **Disassemble**
- ◉ **Destroy**
- ◉ **Verify**

Secure Transport

- ◉ **Track**
- ◉ **Secure**
- ◉ **Relocate**
- ◉ **Reassemble**

TechR2 upholds the highest industry standards for compliance with over 20 regulations and guidelines.

About TechR2

As Subject Matter Experts (SME) in the field of End-of-life Media Ecosystem Solutions, TechR2 has successfully proven its ability to mitigate the many risks your industry faces.

With over six ISO, NIST and NAID AAA certificates, we are prepared to help fulfill the ever-expanding State, Federal and International requirements within all of your end-of-life management tasks.

The challenges you encounter in managing data assets, passing audits, and meeting each unique industry requirement are all areas of our expertise.

We are committed to your data security compliance, and we offer you the following assurances:

Innovation

- The only company in the industry awarded with a U.S. Patent for its comprehensive Track-Contain-Destroy-Verify™ process
- Currently we have 9 patents pending

Experience

- Combined industry expertise of over 35 years of experience in cybersecurity, industry compliance, engineering with 100% performance, and customer satisfaction
- Our qualified field team expertise is focused on continuing education and certified training for best practices and resources to support our partners

Compliance

- Certified in six different international standards of management systems which include ISO-27001, 20243, 31000, 9001, 14001, and 45001
- Upholds highest industry standards in accordance with NIST 800171R2
- Certified to the requirements of the NAID AAA industry standard

A Trusted Partner

- Zero landfill policy
- Backed by Lloyd's of London
- Minority Business Certified and Woman Owned Company
- Founded in 1997

Where do your hard drives go at night?
