One single device. One single regulation. So many probabilities

(to land you in real trouble).

Here are a few:

Probabilities	Real Troubles
One mismanaged, untracked decommissioned **hard drive goes missing**.	Serious **legal** consequences.
One **regulatory demand** is **compromised**.	Crushing **fees**.
One inactive device **containing critical data** is **stolen and made public**.	Irreparable **harm** to reputation, financial ruin, corporate board rejection.
All of the above.	**Fear, doubt, uncertainty**.

We end troublesome probabilities with our End-of-life data management solutions.

Each and every decommissioned hard drive is **tracked, contained, destroyed, and verified**.

All meticulous regulations for data security are **applied**, including **NIST** and followed by **six ISO** certifications.

All of the above.

TECHR2 IS **NIST COMPLIANT**

ZERO TRUST MODEL

Achieve **GDPR** COMPLIANCE

"Year after year we see IT Asset managers using conventional, and deficient data retirement policies and procedures, without paying adequate attention to the alarming data vulnerabilities still remaining."

Zero-Trust, NIST, ISO, and GDPR standards demand more meticulous factors of management for protecting data-at-rest, beyond ITAD.

TechR2's Tear-A-Byte® 24U and 10U appliances work in part of the patented Tear-A-Byte process, to fulfill regulatory demands, and achieving unmatched industry compliance.

We follow risk-averse processes that track, contain, destroy, and verify each step within the four walls of the enterprise.

TEAR–A–BYTE®
PATENTED PROCESS

Appliance Features

- ✓ 10U and 24U capacities.

- ✓ Works in part with the Tear-A-Byte® process.

- ✓ The 24U securely contains up to 1,000 data bearing devices.

- ✓ Integrates RFID technologies.

- ✓ Internal container is removed and devices are processed by two certified TechR2 technicians.

tech2

"Tear-A-Vault fulfills regulatory demands and achieves State, Federal, and industry compliance."

Tear-A-Vault follows the same rigorous Tear-A-Byte® patented process to securely store and wipe retired hand held devices and laptops.

Appliance Features

- Securely holds over 200 retired endpoint hand held devices, especially laptops.

- Provides access to our secure wiping application process after first connecting the device to the internally accessible cable. Then follow the instructions on the front screen.

- Integrates RFID technologies.

- 100% Configurable to the customers' requirements.

- Useful as a lockable, secure storage space.

TEAR-A-VAULT

For Laptops, Phones & Tablets

Go Beyond ITAD.

tech2

Comprehensive Products & Services

- Tear-A-Byte® solution for Tracking, Containing, Destroying, & Verifying data-bearing devices

- Data Eradication Services that are NSA compliant and to NIST 800-171r3 standards

- Risk Assessment and Mitigation

- Datacenter Decommissioning

- Secure Transport Services

- Wiping Services using DoD 5220-22.M three pass overwrite plus a fourth pass for verification

- ISO 14001 IT Asset Retirement with secure SMART techBOX recycling containers.

![tech2 logo]

Since 1997, we have continued to demonstrate ourselves as a trusted global partner to many Fortune 50 Technology Executives.

Innovation and experience have fashioned us as the subject matter expert in end-of-life data and lifecycle ecosystem management.

The challenges in managing data assets, passing audits, and meeting each unique industry requirement are all areas of our expertise.

With numerous ISO, NIST and NAID AAA certificates, we are qualified and committed to **your** data security management, in satisfying **your** regulatory demands, and achieving **your** unmatched industry compliance.

We offer **one** standard of service: **Excellence.**

Innovation	100%
Experience	100%
Compliance	100%
Customer Focus	100%

Innovation

- TechR2 is the only company in the industry awarded with a U.S. Patent for its comprehensive Track-Contain-Destroy-Verify process
- Currently we have 9 additional patents pending

Experience

- Our progressive field team expertise is focused on continuing education and certified training for best practices and resources to support our partners
- A trusted global partner with decades of cybersecurity certified experience, industry knowledge and expertise

Compliance

- Certified in six international standards of management systems which include ISO-27001, 20243, 31000, 9001, 14001, and 45001
- Upholding the highest industry standards in accordance with NIST 800171R2

A Trusted Partner

- Zero landfill policy
- Backed by Lloyd's of London insurance
- Minority Business Certified and Woman Owned Company (MBE)

"Bring your Enterprise the best in End-of-life data management, and inherit legal, financial, and regulatory soundness (NIST, ISO, and more), solid data security practices, and peace of mind."
