SYSTEMS ENGINEER 1

TechR2 is seeking a dedicated and detail-oriented System Engineer 1 to join our growing team. As an SE1, you will play a key role in supporting operations, maintaining security standards, and ensuring compliance with our mission as a technology solutions provider.

Key Responsibilities:

- Material handling tasks including safely loading and unloading trucks.
- Operate hand trucks (pallet jack) and palletize equipment for transport and storage.
- Test IT assets for specifications, functionality, and cosmetic integrity.
- Prepare and maintain reports using Microsoft Word, Excel, or PowerPoint.
- Accurately enter data into the TechR2 Inventory Management System.
- Maintain TechR2's physical and digital security standards.
- Partner with team members and leadership to ensure operational goals are met.
- Attend and actively participate in scheduled meetings.
- Operate TechR2 fleet and rental vehicles responsibly.
- Travel and participate in on-site projects (50–70% of scheduled work time).
- Work overtime as scheduled and when business needs require.
- Adhere to all company policies, procedures, and operational standards.

Qualifications:

- High School Diploma or equivalent (GED).
- Proficiency in basic computer skills.
- Ability to read, comprehend, and follow written instructions accurately.
- Strong communication and organizational skills.
- Ability to lift and move items weighing up to 50 pounds.
- Valid driver's license and legal ID.
- Willingness and ability to travel and perform work on-site 50–70% of scheduled time.
- Successful completion of all required background checks and drug screens.
- Ability to handle confidential information with discretion.

Why Join TechR2?

- Forward-thinking, collaborative team environment.
- Opportunity for significant impact in day-to-day operations.
- Growth potential with hands-on technical and operational experience.
